FIRE SAFETY

What is a Fire Drill?

A Fire drill is when you practice and pretend there's a fire.

To keep everybody safe we will have a fire drill every month.

We will not tell anybody when the fire drill is going to be.

We have a notice on the wall about our fire drill and there is a map showing you how to get out

Fire notices are beside the main light switches.

What Happens When There's a Fire Drill practice?

The fire alarm will sound so that you know what it sounds like. It's very loud!!:

A Staff Member will shout FIRE!

Stop whatever you are doing immediately and leave the building with your room staff

Do not bring anything with you like your bag/coat toys etc.

Listen to and follow staff

Know your way out & stay out!

Go straight to the fire assembly point:

Fire Assembly Point is Stanley Street, Off Brunswick Street North, Dublin 7.

Exit through Fire Door and line up neatly on the footpath

Fire Assembly Point

Fire Exit

Your room staff will do a roll call, listen for your name and when it's called shout 'here' very loudly.

Do not go back into the building until your room staff says its safe and ok.
